

LOCAI

Local AI for Caregivers

Team A21

AI is not a privilege.

LOCAI puts it back in the hands of
the people who need it most.

Caregiving Welfare Association

~210,000

informal caregivers in Singapore

CWA addresses caregiver burnout, social isolation, financial stress and the growing digital divide that leaves caregivers without safe access to modern tools.

They serve a largely invisible but critical population — many managing alone without adequate support.

Project Aims

Deploy a working local AI tool for CWA — privacy-first caregiver resource assistant + burnout self-assessment

Run AI literacy workshops for caregivers to use AI independently & safely

Key Benefits

Raise youth awareness on caregiving crisis and ethical AI use

Efficiency gains WITHOUT cloud privacy risks (fully on-device AI)

Measurable reduction in caregiver digital barriers

Youth capacity-building in AI ethics and social impact

On-Device AI (Local AI)

Zero data sent to cloud or 3rd-party servers. Caregivers handle sensitive medical & mental health records — privacy isn't optional.

Burnout Self-Assessment Tool

AI-powered conversational tool tailored to caregiver stress patterns. Flags burnout risk and routes to CWA resources proactively.

Emotion-First Design

Every workshop anchors to a real caregiving scenario before introducing the tech — removing fear and building genuine engagement.

Green AI Education Segment

Embeds AI's energy/water footprint in every event using personal comparisons — making ethical AI consumption tangible for youth.

Deep Cause Understanding: CWA's exact pain points (data privacy + digital divide + burnout) directly shaped every feature.

IMPLEMENTATION & EXECUTION

20%

MAY

Phase 1 Foundation

- ✓ CWA onboarding & co-design
- ✓ Volunteer recruitment
- ✓ Social media campaign launch

JUN

Phase 2 Activate

- ✓ AI Literacy Workshops × 3
- ✓ Run Your Own AI – Public Lab
- ✓ Community partnerships live

JUL

Phase 3 Scale

- ✓ Charity Marathon
- ✓ AI Exhibition & Expert Panel
- ✓ Door-to-door fundraising × 3

AUG

Phase 4 Close

- ✓ Final door-to-door sessions
- ✓ Impact report to CWA
- ✓ Post-project debrief

SSA Challenges Addressed

Privacy-safe AI tool built specifically for CWA's sensitive data needs • Digital literacy gap closed via hands-on workshop series • Volunteer consistency: 30% over-recruit + weekly standups + bounded deliverables

The Issue We Address

Caregivers in Singapore are digitally excluded from tools that could reduce their burden — while handling highly sensitive data that cloud AI cannot safely process.

Why It Matters:

AI illiteracy has real human consequences — longer burnout cycles, missed resources, data exposure

210,000 caregivers represent an invisible crisis in Singapore's ageing population

How We Create Awareness

School campaigns, posters & student council partnerships

Social media storytelling — impact stories, countdowns, caregiver spotlights

Merchandise designed by student volunteers — wearable awareness

Estimated Reach AI Exhibition open showcase with expert panel

500+

Workshop
Participants

2,000+

Social Media
Impressions

300+

Marathon Attendees

VOLUNTEER MOBILISATION & FEASIBILITY

10% + 10%

Volunteer Mobilisation

Recruitment

School campaigns, social media, design/art/STEM club partnerships

Teams & Roles

- ✓ Merch Design Team — logos, stickers, posters
- ✓ Marketing Team — campaigns & promotions
- ✓ Sales Team — merch during events
- ✓ Operations Team — packaging & distribution

Motivation & Retention: Certificates issued • Leadership roles for top volunteers • 30% over-recruit buffer

Financial Targets & Feasibility

\$10,785

Projected Income

\$1,645

Projected Expenditure

\$9,140

Projected Net Profit

5 Diversified Income Streams

YFC Seed Funding	\$1,200
Paid AI Workshops (x2)	\$1,425
Corporate Micro-Sponsorships	\$900
Charity Marathon	\$4,700
Door-to-Door + Merch + Exhibition	\$2,560

No single stream needs to overperform. Risk is distributed.

CHALLENGES FORESEEN & WHY US

Caregivers disengaging from AI content

Anchor every session to a caregiving scenario first — emotion before technology. The human story drives retention.

Low public turnout at showcase

Burnout Meter Installation is photographable & emotionally resonant. CWA taps its community network for a ready audience.

Volunteer inconsistency over 3 months

30% over-recruit, bounded deliverables, weekly standups. No single person is a point of failure.

AI awareness seen as 'not a real cause'

Every event ties back to real caregivers in Singapore — AI illiteracy has immediate human consequences.
